

GEMOLOGICAL MICROSCOPE IGM-1200 SERIES

Gemological Microscope IGM-1200 Series used to examine diamonds, emeralds, rubies and all other types of precious stones. Available in binocular and trinocular form for the capture of the gem provides you with an opportunity for extra revenue. Designed with 3 different types of illumination making it a very flexible stereomicroscope including Fluorescent lamp, LED, and Halogen illumination. These microscopes ensure good status for having outstanding optics, rugged dependability, flexibility and low-cost to perform identifications, analyses, and measurements more accurately and efficiently, thus reducing your workload. At a working distance of 115 mm with a 1:6.3 zooms ratio. Ideal for working with subtle jewelry, gemstones and used in the design, creation, production, and repair of jewelry under high magnification 0.8X-5X to provide quality image.

Features

- ◆ Good quality illumination along with gem clamp and dark field attachment
- ◆ Gemological microscopes is cost effective and inexpensive and high level professional microscope
- ◆ Accomplished to provide the best viewing conditions
- ◆ Cast-off by jewelers, gemologists, and stone setters, gemological microscopes
- ◆ Specially designed for use in the industry to observe and evaluate different types and grades of precious stones
- ◆ Capable with user-friendly operation system
- ◆ Built-in 3.2 MP camera which can captures great gemological images with a simple click
- ◆ Maximum magnification of up to 0.8X-5X
- ◆ Auxiliary- 0.5X220 mm, 0.7X125 mm, 2X125 mm objective as an optional accessories
- ◆ High wild field WF15X16 mm with diopter adjustment
- ◆ Dark field working stage (with Iris diagram)
- ◆ 9W Fluorescent lamp, LED Point Light, 6V/20W Halogen illumination light source
- ◆ Binocular and trinocular inclined 45° and a 360° rotatable head with interpupillary distance 55 to 75 mm
- ◆ Small foot print and light weight
- ◆ Easy operating with ergonomic design

Technical Specifications

Model	IGM-1200	IGM-1250	IGM-1260
Type	Gemological Microscope		
Magnification	0.8X-5X		
Viewing Head	Binocular Viewing Head, Inclined at 45°, Interpupillary Distance: 55-75mm	Trinocular Viewing Head, Inclined at 45°, Interpupillary Distance: 55-75mm	Binocular Digital Viewing Head, Inclined at 45°, Interpupillary Distance: 55-75mm
Digital System	-		Resolution: 2048×1536(, 3.2MP)
Focusing	110 mm for observing different size gem and sample		
Eyepiece	WF15X16 mm with diopter adjustment (optional: WF10X22mm, WF20X12mm, WF30X9mm)		
Zoom Ratio	1:6.3, 115 mm		
Objective	optional: Auxiliary Objective 0.5X220 mm, 0.7X125 mm, 2X125 mm		
Stage	0°-325° Rotatable base and stand 0-38° Inclined, so the height and angle of eyepiece can be adjusted, easy to operate and a gem clamp fixing of both side		
Light Source	9W Fluorescent lamp, LED Point Light, 6V/20W Halogen illumination		
Gem Clamp	High quality steel clamp is perfect to hold the gem for observation from all directions
